## Micro e-learning now available

Since May 2023 you can sign up for a micro e-learning course on Website development. The course is particularly adapted for the needs of NGO employees and self-employed adults. Clearly and in an attractive way, it explains the issues of creating a website, i.e. how to develop an attractive and engaging web presentation, how to follow the necessary security rules, how to make the website easily accessible and interesting for the audience.

## Study in your language

The newly developed micro e-learning course consists of six lessons on creating a website. All the content available at the website ([www.digital-adults.info](http://www.digital-adults.info)), is presented in three languages: English, Lithuanian and Czech.
